iPad Essentials - Connecting the Third Age

The internet is an intrinsic part of life in 2012. The internet is a great way to find information, stay in contact with family and friends, be entertained and, importantly, maintain your own independence. You will be able to learn how to do all these things on the iPad. It's much simpler and easier to use than a computer. It's great for beginners. The course will be run in small groups and the training will be tailored to your own needs.

To participate in the program you will need to purchase an iPad 2 for your own use and install wireless broadband at home. We can help source a seller for you and find the best possible price, and help to organise broadband and install a wireless modem.

The basic price for an iPad 2 (16 Gg) is \$520.

Please contact us for further details. Phone: (03) 8781 4220
