"We have engaged McKimm Developments several times for both commercial and residential work since 1995 and always find the quality of work and client relationship to be the reason we will return every time".

Barb Dight-Owner

McKimm Developments

McKimm Developments was established by Nick McKimm in 1991, starting with his early training as a qualified carpenter and a passion for building he soon made the transition to Registered Builder.

Since its inception the company has progressively become regarded as one of Melbourne's leading custom builders. McKimm Developments has gained a reputation for stylish, high-end projects, and are renowned and respected as builders capable of taking on projects of diverse and complex architecture.

Over time McKimm Developments has built strong relationships with many of Melbourne's leading Architects. The reasons are simple, apart from our professional friendly manner, Architects are reassured of our skilled trade resources and expertise to always deliver a quality project on time.

McKimm Developments are boutique builders with building integrity, quality and attention to detail, our philosophy has always been to carry out only a measured number of jobs at any one time, embracing flexibility while learning from Architects and often leading Architects to better details and solutions.

"Tender by Negotiation" rather than the traditional tender arrangement is recognized by Architects and Clients as the preferred way of obtaining McKimm's involvement, with the company's willingness to look at a job from the concept stage and assisting in developing the project to achieve the best outcome for all parties.
